RETAIL

The retail sector is unique in the many security challenges it offers. Open shop floors, crowds, dynamic operations and aesthetics all contribute to a very different security requirement from other industries. Orion have been a leading provider of retail security and have formed partnerships with many major high street brands including John Lewis, Sainsbury's, Nike, Adidas and Marks & Spencer.

Retailers have the constant challenge of "shrinkage". Whether the risk is customer or staff theft, fraud and false accounting, collusion or burglary and robbery, we have a risk management programme and world class support to eliminate and reduce loss.

We know how retailers work. As partners we take a responsibility for shrinkage and strive to deliver an environment free from crime and the fear of crime for customers and staff.

Our retail solutions include:

- CCTV Systems
- Access Control/Biometric Systems
- Intruder Detection and Alarms
- Internet Protocol (IP) Systems
- Radio Frequency Identification (RFID) Systems
- Electronic Article Surveillance (EAS) Systems
- Automatic Number Plate Recognition (ANPR) Systems
- Public Address Systems
- People Counting Systems
- Perimeter Detection
- Covert Technologies

COMMERCIAL & INDUSTRIAL

Orion Security is a leader in the supply of bespoke solutions for office and industrial premises. We have experience in the design and installation of IP, biometric and card access entry control systems that provide efficient and managed visitor entry and time management of employees.

We also provide the latest intruder alarm systems that allow section and department access and entry at specific times and by specified card holders.

The CCTV systems are IP compatible and allow for the local or remote monitoring of specific cameras as part of a security or efficiency programme.

// The introduction of Orion's access control system has streamlined visitor processing and the deterrent measures have drastically reduced the number of theft incidents at our head office. //

HEALTHCARE

Providing a safe working environment for patients, nurses, doctors, care staff and contractors is an operational and legal requirement in hospitals, GP surgeries, residential care homes and all healthcare premises. There is a responsibility to ensure that any healthcare environment is free from crime and the fear of crime and that patients and staff, and their belongings, are safe at all times.

We are well practiced in the risk assessment necessary to provide this environment and have been involved in the design and installation of specific crime prevention and crime detection solutions for healthcare premises.

We are able to provide secure system technology and protection for dangerous drugs and patient records with live remote CCTV monitoring of small independent sites as well as the full integrated campus solution incorporating personnel attack alarms, full access control and radio frequency identification asset protection.

Our experience within the private sector, residential care homes and regional health authorities has allowed us to develop effective solutions to meet the specialised needs of the healthcare environment.

// The web based CCTV system has improved overall security of not only the hospital; but also the surrounding car parks. //

EDUCATION

Orion has worked with local education authorities, head teachers, police, governors and fire brigades to understand and develop integrated systems designed to address the special security issues of the education sector.

Education facilities are often a target for vandalism, theft, and arson. The use of CCTV systems, access control, and intruder detection is widely accepted as a deterrent to anti-social behaviour. Assaults, abusive and threatening behaviours are a rising concern within the education sector. Students, pupils and staff are increasingly at risk of assault or accident.

Our measured solutions include access control systems with radio frequency identification and payment facilities that allow for assigned ownership, recreational opportunities and asset protection.

Physical protection of building and open spaces is also important in maintaining a crime free environment. We install and maintain comprehensive CCTV systems that have remote access functionality and are often part of a local authority monitored initiative, widely advertised for the best deterrent value.

We have a proven track record for providing security solutions in universities, schools and colleges that include approved lease and finance payment options.

// Orion's security measures have cut down dramatically on the number of computers lost each year through this department. //

LOCAL AUTHORITIES

Orion Security Solutions is an active supporter of town centre partnerships and local crime prevention strategies either individually, or as part of wider local authority or local government initiatives.

Working with crime partnerships we have developed internet protocol CCTV camera solutions that enable remote access and evidential image quality gathering to support crime enquiries and convictions.

Rapid response mobile solutions are available by infra-red link and proven wireless technology.

We also provide our own mobile CCTV platform with the very latest image capture and evidential recording equipment that is available for short or long term hire, with or without an experienced operator.

// We had a requirement for a rapid response solution to support a crime prevention campaign. Orion installed and supported the equipment with great professionalism. //

LEISURE

We have an established history of providing solutions to:

- Conference and Hotel facilities
- Health, Fitness and leisure centres
- Gambling and betting casinos and outlets
- Pubs, Clubs, Restaurants and all Licenced Premises.
- Sporting Venues

Managing security at venues and events is an essential service in the leisure markets and it can be a challenging business, especially at multiuse venues where hotels, gyms, bars, casinos and other revenue generators are attached to the venue and open access is encouraged.

Our team offers you a range of services, from access control to guarding and protecting via CCTV systems, to alarm response and remote monitoring. With our knowledge of the leisure industry, we provide a service that delivers solutions based on risk for customers, venue staff, club members, fans, VIPs, and other venue stakeholders.

We are able to provide full solutions for covert operations in the leisure and gaming industry as well as outside event security management, access control solutions with people counting software, identification management, full body scanning entrance solutions and general crime prevention and crime detection strategies.

SPECIAL PROJECTS

We currently support a number of FTSE 100 and international companies with a full service solution for the design and installation of all types of electronic surveillance systems and their counter measures. We are also qualified to provide advice and support with personal protection issues.

We would be happy to discuss individual requirements.

// Orion Security has supported us at our corporate headquarters and outside events where competitive advantage and governance issues are extremely important. //

ORION SECURITY SOLUTIONS

Our desire to provide a world-class service is the force behind our policies and accreditation as well as your guarantee of outstanding service delivery.

We are an NSI GOLD accredited company with ISO 9001 quality assurance and we are an investor in people. We take seriously the training and development of our staff and are pro active in all areas of quality management within the company.

We are also environmentally aware; exceeding all national and international guidelines for the use, transportation, recycling and disposal of waste and equipment

But arguably it is the service we provide that makes a difference. We design, install and maintain all types of security systems for a broad range of business – but with a difference. We have a wealth of crime prevention knowledge that is world class, and we use this knowledge together with local and national crime statistics, demographics and our own data intelligence to determine the risk and the best solution.

We are not simply a service provider.

We are a partner.

We will not let you down.

COMPANY OVERVIEW

Orion Security offers complete solutions in closed circuit television, intruder alarms, access control and covert technologies. We design, install and maintain integrated systems for some of the UK's leading organisations both in the private and public sectors.

By offering innovative and cost effective solutions, we have created a winning formula that is based on our expertise in customer requirements. We aim to maximise cost efficiencies, whilst creating and maintaining an environment that is free from crime and the fear of crime.

By being supportive, customer focused and problem solving, we are able to quickly identify the real needs of individual clients and offer appropriate solutions. We make it our business to offer an in-depth assessment of each client's individual requirements. One solution is not the answer.

So if you are in the business of security, whether looking to buy, upgrade or maintain, we aim to be your partner of choice.

CCTV

Covert Technologies

At the heart of our business is a focus on people and partnership. The number one priority is to deliver consistently high levels of customer service, through committed and talented people.

This is a people business: people serving people. Our Vision and Values reflect this focus.

VISIONS

People

Creating and maintaining environments free from crime and the fear of crime for customers, visitors and staff

Property

Ensuring the full integration of crime prevention and security measures to protect property and ensure business continuity.

Profit

Maximising profit and potential with integrated, intelligent, deterrent and crime detection strategies and installations

Brands

Protecting brand, reputation and image

VALUES

Passion

We go that extra mile

We are passionate about customer service. This means giving our customers total commitment, working with energy and the desire to succeed, exceeding expectations and developing long term relationships.

Pace

We have the drive to exceed our goals

We're proactive, quick to spot and seize an opportunity. We constantly strive to improve.

We react to the needs of our customers with speed and commitment.

People

We treat people how we would wish to be treated

Our people are expert, friendly and enthusiastic. We respect our colleagues and create a working environment where customer service is part of the DNA. We make a difference to the communities in which we serve.

Performance

We do what we say we will do

Our customers place their trust in us. We strive to reward that trust through outstanding performance. We maintain our competitive edge. We are commercially aware and wholly accountable for our actions.

Pride

We are proud of our business, our team and our partnerships

Pride comes from having contented customers and by getting the job done properly first time.

We deliver high quality products and services. We recognise and reward success.

PARTNERSHIPS WITH

We are pleased to be the partner of choice for many businesses, organisations and public bodies across the UK and Europe.

From design and installation to maintenance and special projects, Orion offers an unrivalled wealth of experience and technical expertise to organisations of every size.

We never forget you have a choice.
